Reliable Connectivity Solutions for First Responders

HPUE to the Rescue

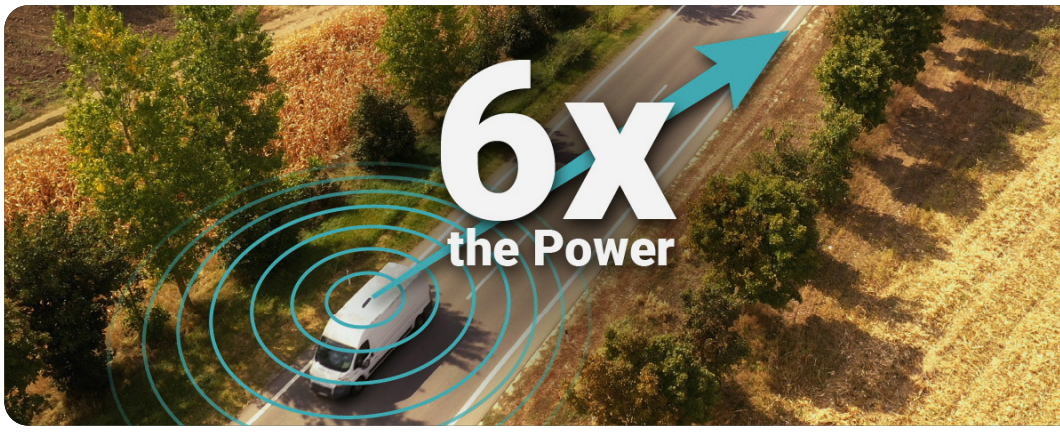
When your mission-critical systems, operations, and people rely on voice and data connections, it only makes sense to have the highest power solution available. High Power User Equipment (HPUE) is a specialized class of cellular device with up to 6x the uplink power of standard devices, to keep you connected in more places. HPUE is especially helpful in rural, edge-of-network locations where signal coverage may be spotty, or in dense urban environments where building materials block signals.

HPUE products use our patented IntelliRange® Technology to create a reliable connection to the macro cellular network. That cellular signal is used by our AirgainConnect® MegaFi 2 and AirgainConnect® MegaGo 2 routers to create a Wi-Fi hotspot, maintaining connectivity where standard routers cannot.

Stay Connected In Hard-to-Reach Places

Everyday, in every sitution, communication is key

Enabling teams and incident commanders to stay in contact in an emergency is fundamental to keeping everyone safe. The MegaFi 2 turns every vehicle into a Wi-Fi hotspot, even in hard-to-reach places. When headed into rural areas, unfamiliar terrain, underground, or other places where cellular signals may be blocked, HPUE routers significantly increase the chances of staying connected.



Take the Deadspot Challenge

Test our routers on your own turf!

- Sign up on our First Responders page. Be sure to include the zip code where your trial will take place (if in U.S.).
- Our demo team will work with you to plan your test drive and show you how to set up the device(s).
- We'll send or drop off the demo unit(s), providing you the support you need to properly operate the unit and see the performance.
- Test coverage in your dead spots for the next 21 days. During that time, we will gather data from the unit (remotely).
- At the end of the trial period, we'll follow up with a performance report and collect the demo unit.

MegaFi 2 Fixed

MegaFi 2 Mobile

MegaGo 2

Who do you need to connect?

- Law Enforcement
- Firefighters
- Emergency Transport / Rural EMS
- Call Center Personnel (PSAPs, 9-1-1)
- Medical Staff / Telemedicine
- Disaster Response Teams
- Critical Infrastructure Repair Crews
- Supply Delivery Drivers
- Government Agencies
