1 Introduction

1.1 Scope

This document is the End of Life (EOL) Product Change Notification (PCN) for the following Airgain Skywire modems:

Orderable Part Number	Firmware Version
NL-SW-LTE-TC1NAG	25.21.2x0/MOF.260010
NL-SW-LTE-TC1NAG-B	25.21.2x2/MOF.260012

This PCN also introduces the NL-SW-LTE-TC1NAG-C Skywire modem, which is the recommended replacement:

Orderable Part Number	Firmware Version
NL-SW-LTE-TC1NAG-C	25.21.2x4/MOF.260014

Note

Due to evolving PTCRB cellular certification requirements, additional device testing may be required. Please contact your cellular carrier for more information.

1.2 Contact Information

Airgain's goal is to make integrating Skywire modems into your products as easy as possible. Please visit the [NL-SW-LTE-TC1NAG product page](#) for updated documentation and NL-SW-LTE-TC1NAG-C ordering information.

Please send any feedback, documentation requests, or technical support questions to the Airgain Product Support Team at product.support@airgain.com.

Any additional sales questions or requests for quotation can be directed to the Airgain Sales Team at sales@airgain.com.

2 Product Change Information

2.1 New Firmware Version

Airgain often releases new orderable part numbers for Skywire modems to take advantage of bug fixes, improvements, and new features introduced by cellular module manufacturers in their firmware. Adopting new firmware versions is also often required by certification agencies, regulatory bodies, and cellular carriers.

The NL-SW-LTE-TC1NAG and NL-SW-LTE-TC1NAG-B are being transitioned to EOL because their underlying Telit Cinterion modules have reached the end of their PTCRB 3-year NAPRD03 validity periods. This has the following implications for end products:

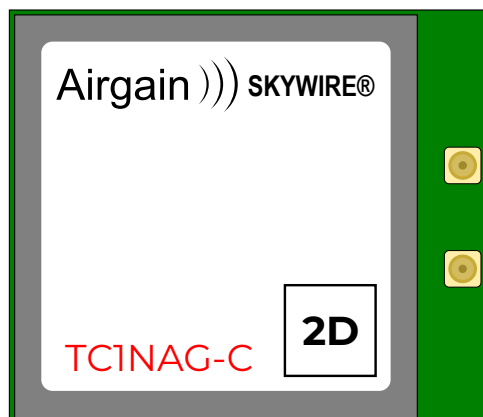

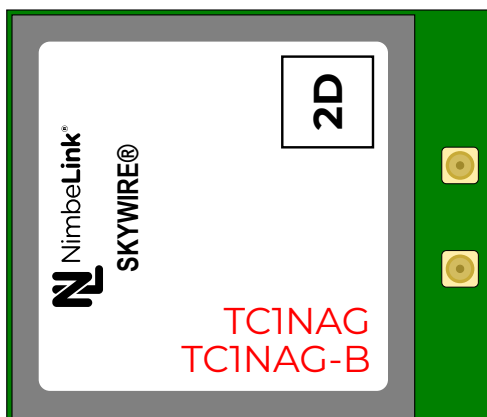

- End products obtaining initial PTCRB certifications must use the NL-SW-LTE-TC1NAG-C.
- End products with existing PTCRB certifications may continue using NL-SW-LTE-TC1NAG and NL-SW-LTE-TC1NAG-B modems. However, Airgain advises adopting the NL-SW-LTE-TC1NAG-C as soon as possible.

The new firmware introduced with the NL-SW-LTE-TC1NAG-C also offers:

- Upgrades to the FOTA, SSL, TCP/IP, MQTT, and GNSS stacks
- Stability improvements and bug fixes

2.2 Label Orientation and Branding Changes

The NL-SW-LTE-TC1NAG-C label design has also been modified. The label has been rotated 90 degrees and the branding has been changed from NimbeLink to Airgain. This change is cosmetic and does not affect the label contents (IMEI, ICCID, etc.) or the barcode encoding.

If your manufacturing process includes visual inspection of Skywire modem labels and/or barcode scanning, Airgain recommends reviewing manufacturing work instructions and confirming that scanning equipment can accommodate the new orientation.

2.3 Migration Overview

The NL-SW-LTE-TC1NAG-C is the recommended replacement part number. This modem is identical to the NL-SW-LTE-TC1NAG and NL-SW-LTE-TC1NAG-B, aside from running a newer version of Telit Cinterion firmware (25.21.2x4/M0F.260014).

Airgain has performed testing with the new firmware version to confirm that modem behavior, functionality, and AT command responses remain consistent with previous firmware versions. However, Airgain strongly recommends that customers perform their own evaluation and integration testing before migrating.

Customers with existing NL-SW-LTE-TC1NAG and NL-SW-LTE-TC1NAG-B modems can update to the new firmware using a USB or FOTA update. To obtain firmware files and release notes, customers may do either of the following:

- Obtain the files directly from Telit.
 - The Windows USB FW installer can be obtained from the [Telit Cinterion LE910Cx Download Zone](#) under the *Firmware Releases > LE910C1-NF* section. The installer is named [TC_LE910C1-NF_25.21.264_TFI.zip](#).
 - FOTA files can be requested from Telit using their [IoT Modules Support Request Form](#).
 - Firmware release notes can be obtained from the [Telit Cinterion LE910Cx Download Zone](#) under the *Release Notes/Delta SW > LE910C1-NF* section.
- Contact Airgain Product Support at product.support@airgain.com. Airgain will provide applicable files under NDA.

Airgain is committed to supporting customers throughout the migration process and to ensuring a smooth transition to the NL-SW-LTE-TC1NAG-C. Please direct general support requests and questions to the Airgain Product Support Team at product.support@airgain.com. Customers who need to continue deploying older modems should contact the Airgain Sales Team for long-term support at sales@airgain.com.

2.4 End of Life Schedule

The table below defines important dates for the NL-SW-LTE-TC1NAG and NL-SW-LTE-TC1NAG-B during their transitions to End of Life. Both modems share the same schedule:

Milestone	Date	Notes
Not Recommended for New Designs (NRND)	01/28/2026	All orders placed directly with Airgain must be submitted on or before this date
Last Time Buy (LTB)	06/30/2026	All orders placed directly with Airgain must be submitted on or before this date
Last Time Ship (LTS)	09/30/2026	All orders placed directly with Airgain will ship on or before this date
End of Life (EOL)	10/01/2026	Effective immediately after the expiration of the LTS date

2.5 End of Maintenance

Technical and commercial support for the NL-SW-LTE-TC1NAG and NL-SW-LTE-TC1NAG-B will end according to the standard warranty terms applied to the purchase of the product.
