

## Top 5 Reasons Fleet Teams Choose Airgain Antennas

### LONGER WARRANTY

Built to endure the toughest environments, Airgain antennas come backed by an industry-leading 5-year warranty — a testament to our rugged design and proven reliability.

### LOWER PROFILE

Designed with fleet aesthetics and aerodynamics in mind, RECON13™ and MULTIMAX™ 5G feature some of the lowest profiles on the market — without compromising performance.

### HIGHER IP RATINGS

With IP67 and IP69K ratings, Airgain antennas are built to survive extreme conditions — from vibration and ice to high-pressure washdowns — ensuring dependable operation in the harshest environments.

### FUTURE PROOF

Future-ready with support for Wi-Fi 6/6E/7 and full Sub-6 GHz spectrum, including CBRS, LAA, and Band 71. Airgain antennas are engineered to meet evolving connectivity needs for both public and private networks.

### MAXIMUM FLEXIBILITY

Mounts securely on any vehicle roof—flat or contoured, metal or non-metal. Easily customize cables and connectors. Add an optional whip antenna adapter for extended range and specialized radios.
