1 Mega Portal Release 4.6.5

Release date: February 17, 2026

Mega Portal version v4.6.5 includes the following:

- This release adds the ability for a user to initiate software updates to a pool or selected set of **MegaFi 1** devices as a group
 - Updates can be set to occur immediately (or after the device is online) or can be scheduled for a specific date and hour, up to seven days ahead
 - Notifications will appear on the Devices menu page and the Device Details page for any device targeted for an update
 - Bulk updates are limited to the most recently released software version
- Headers on the Devices menu page have been updated to better describe section contents:
 - **Device Interfaces** has replaced the former EI Interfaces header
 - **Device Event Log** has replaced the former Pending Updates header

2 Mega Portal Release 4.6.4

Release date: January 20, 2026

Mega Portal version v4.6.4 includes the following:

- This release adds the ability for a user to initiate software updates to a pool or selected set of MegaFi 2 devices as a group. Updates can be set to occur immediately (or as soon as a device is online) or can be scheduled for a specific date and hour, up to seven days ahead. Notifications will appear on the Devices menu page and the Device Details page for any device targeted for an update.
- In addition, MegaPortal users can now remotely trigger admin password reset and factory value reset on MegaFi 2 devices. These new features are available under the Options menu on the Device Details page for a particular device.

3 Mega Portal Release 4.5.9

Release date: July 31, 2025

Mega Portal version v4.5.9 includes the following:

- MegaFi 2 users will see notifications on the Devices page and the Device Details page indicating if a software update is available for their device
- Superusers will have the ability to assign an existing admin user account to multiple organizations. Those user accounts will then be given a choice as to which organization to access at login.
- Admin users will initially be taken to the Devices page instead of the Users page

4 Mega Portal Release 4.5.7

Release date: June 10, 2025

Mega Portal version v4.5.7 includes the following:

- In previous releases, rarely an individual GPS coordinate could have an error causing that coordinate to appear outside the US. Those errant coordinates will now be filtered out.
- Previously, when an administrator wanted to delete a user, they would be blocked if that user had added devices and they were still associated with that user's account. This release gives the deleting administrator the option of reassigning the devices as part of the deletion process.

5 Mega Portal Release 4.5.6

Release date: May 13, 2025

Mega Portal version v4.5.6 includes the following:

- A third role, "Read Only" has been added. Organizational members with this role will have the ability to view all organizational devices via the devices menu. Members with this role will not have the ability to change device settings from the MegaPortal
- On the Devices & Device Details page(s), data flow is now expressed as MegaBytes (calculated as 1 MB = 1,048,576 bytes)
- When using the Pools view, device lists now include online status
- When using the Devices view, the count of rows returned shown at bottom right of the window correctly reflects the search result count
- Various bug fixes

6 Mega Portal Release v4.5.5

Release date: April 14, 2025

Mega Portal version v4.5.5 includes the following:

- Downloaded devices and data file names renamed for easier identification
- MegaFi 2 only – MegaPortal users can initiate device software updates to a device even when the device is offline. Update will occur immediately when the device is online.
- Other fixes

7 Mega Portal Release v4.5.4

Release date: March 13, 2025

Mega Portal version v4.5.4 includes the following:

- Provides customers the ability to add/import multiple devices
- Other fixes

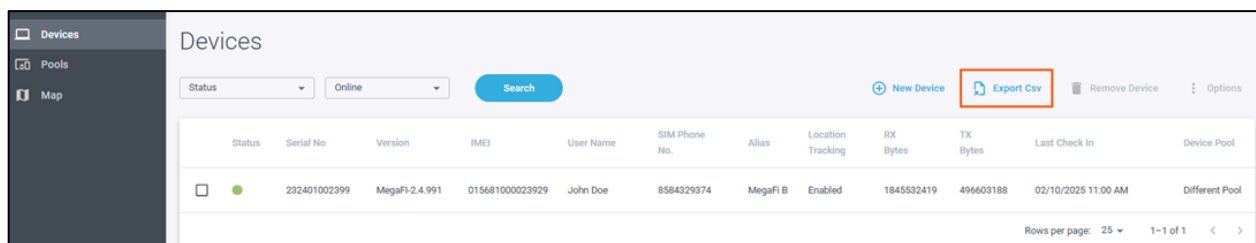

8 Mega Portal Release v4.5.2

Release date: February 18, 2025

Mega Portal version v4.5.2 includes the following:

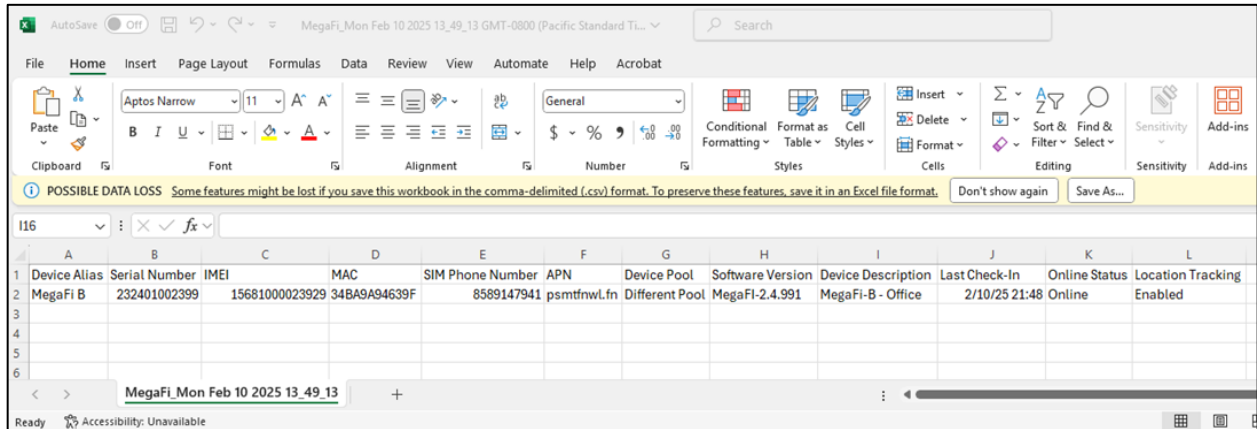

- Retention of map data points extended to 2 weeks
- Number of map data points displayed increased from 1,000 to 2,000
- Enable users to export list of devices

In Devices page, click on **'Export Csv'** at the top to download a csv file with a list of your devices and some information about them

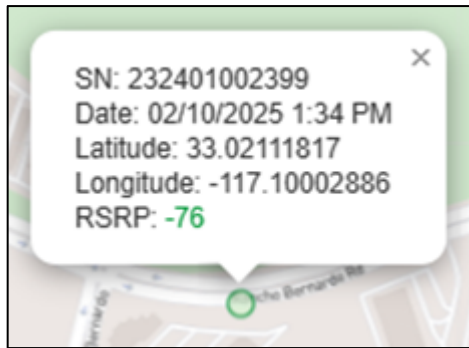

The screenshot shows the 'Devices' page in the Mega Portal. The page has a sidebar with 'Devices', 'Pools', and 'Map' options. The main content area is titled 'Devices' and contains a search bar with 'Status' and 'Online' dropdowns, and a 'Search' button. To the right of the search bar are buttons for 'New Device', 'Export Csv' (highlighted with a red box), 'Remove Device', and 'Options'. Below the search bar is a table with the following columns: Status, Serial No, Version, IMEI, User Name, SIM Phone No., Alias, Location Tracking, RX Bytes, TX Bytes, Last Check In, and Device Pool. The table contains one row of data: a green status indicator, Serial No 232401002399, Version MegaFi-2.4.991, IMEI 015681000023929, User Name John Doe, SIM Phone No. 8584329374, Alias MegaFi B, Location Tracking Enabled, RX Bytes 1845532419, TX Bytes 496603188, Last Check In 02/10/2025 11:00 AM, and Device Pool Different Pool. At the bottom right of the table, it says 'Rows per page: 25' and '1-1 of 1'.

Status	Serial No	Version	IMEI	User Name	SIM Phone No.	Alias	Location Tracking	RX Bytes	TX Bytes	Last Check In	Device Pool
<input type="checkbox"/>	232401002399	MegaFi-2.4.991	015681000023929	John Doe	8584329374	MegaFi B	Enabled	1845532419	496603188	02/10/2025 11:00 AM	Different Pool

- Added device serial number to datapoint popup

- Pending actions now show time stamps for MegaFi 2
- Other fixes

9 Mega Portal Release v4.5.0

Release date: January 13, 2025

Mega Portal version v4.5.0 includes the following:

- Minor styling improvements
- Moved Device Action buttons on Device Details page (see below)
- Other improvements and fixes

Under **Devices**, the buttons within **Device Actions** have been moved from this area in the previous version:

The screenshot displays the Airgain web interface. On the left is a dark sidebar with navigation options: 'Devices', 'Pools', and 'Map'. The main content area is light gray and contains three sections:

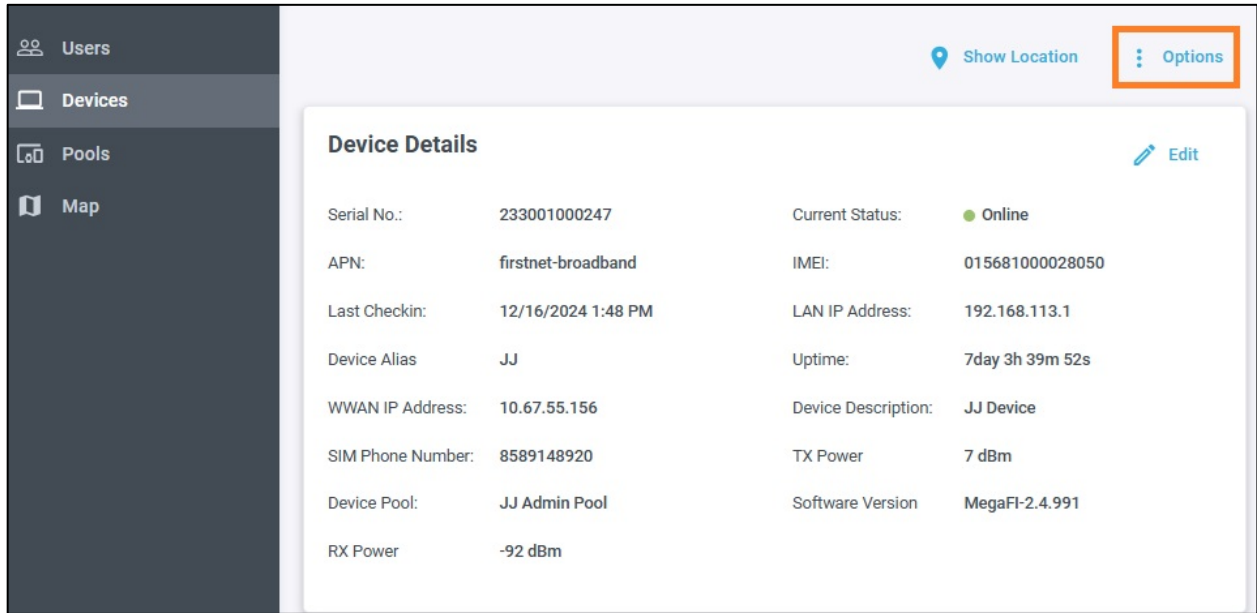

- Device Details:** A card with an 'Edit' icon. It lists various device attributes in two columns:

Serial No.:	232401002229	Current Status:	● Online
APN:	psmtfnwl.fn	IMEI:	015681000023747
Last Checkin:	12/16/2024 1:38 PM	LAN IP Address:	192.168.113.1
Device Alias:		Uptime:	3day 23m 26s
WWAN IP Address:	107.89.140.247	Device Description:	
SIM Phone Number:	9803097361	TX Power:	13 dBm
Device Pool:	New Pool	Software Version:	MegaFI-2.4.991
RX Power:	-89 dBm		
- EI Interfaces:** A table with columns: Type, Port, Received By..., Transmitted Bytes, and Enabled.

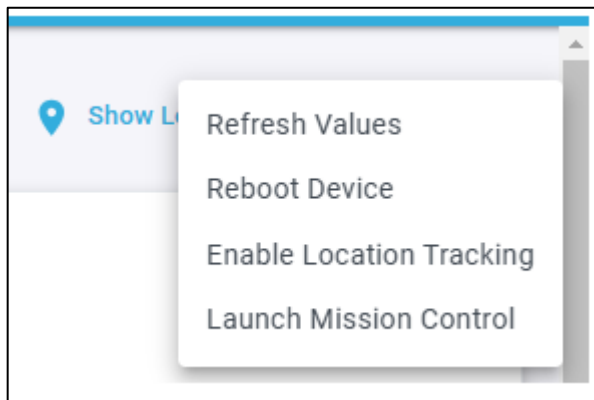

Type	Port	Received By...	Transmitted Bytes	Enabled
WAN	0	469522000	102875033	✓
LAN	1	469527484	102879397	✓
- Device Actions:** A vertical stack of four blue buttons: 'Refresh Values', 'Reboot Device', 'Enable Location Tracking', and 'Launch Mission Control'. This section is highlighted with an orange border.

In the top right corner of the main content area, there is a 'Show Location' link with a location pin icon.

To this spot next to **Show Location** in **Devices** with a drop-down menu now called **Options** in v4.5.0:

If the user clicks on the drop-down menu **Options**, the available selections are the same as before:

10 Mega Portal Release v4.0.7

Release date: October 21, 2024

Mega Portal version v4.0.7 includes the following:

- Update to include time stamp on scroll bar on map page
- Device Details Timestamp format bug

Mega Portal Release v4.0.6

Release date: October 21, 2024

Mega Portal version v4.0.6 includes the following:

- Improved layout and device selection in Map page
- Standard footer added to site
- Updated layout and styling in Device Details
- Updated Device List table
- Ability to add MegaFi 2 devices to Portal
- Various bug fixes

11 Mega Portal Release v4.0.2

Release date: October 17, 2024

Mega Portal version v4.0.2 includes the following:

- Performance improvements to make the Portal more robust and responsive
- Improved search functionality
- Various bug fixes

12 Mega Portal Release v3.10.6

Release date: June 13, 2024

Mega Portal version v3.10.6 includes the following:

- Button redesign
- Improve UI of Map page treeview
- Fix the layout around the Key Field dropdown
- Improve map popup
- Change “User Name” to “Full Name”
- Location Map: Download Data Fails when shortcut link is used
- Bookmarked link doesn’t redirect back to a login page

13 Mega Portal Release v3.10.5

Release date: May 23, 2024

Mega Portal version v3.10.5 includes the following:

- Clear cache on re-login
- Map Tab - Device List Scrolling
- Map: Display "Show device route" only when the datapoints exist
- Organization Admins can only view first 25 user accounts
- Allow company admin end user to authorize Airgain support access to their system pool or company organization
- Apply pending actions to a pool of devices
- Remote Management - Front-end Task - Launch Device Mission Control
- Distinguish between Mobile and SIM Phone Number
- Rename "Location Trail" to "Location Tracking"

14 Mega Portal Release v3.9.2

Release date: April 2, 2024

Mega Portal version v3.9.2 includes the following:

- Ability to download software version 2.4.44

15 Mega Portal Release v3.9.1

Release date: February 15, 2024

Mega Portal version v3.9.1 includes the following:

- Ability to download software version 2.4.43

16 Mega Portal Release v3.9

Release date: January 30, 2024

Mega Portal version v3.9 includes the following:

- Fixed device checkbox not checked in Device list when selected from Device Details
- Location Mapping
 - Capture device GPS trail
 - Present a traffic light for measurement points based on RSRP strength
 - Sliders to zoom in on desired time intervals and other improvements
 - Pop-up information bug
 - Colors of signal strength changed to industry standards and specify RSRP in signal strength and correct values
 - Signal strength disclaimer
 - Option to hide and show device route
 - Created a “Refresh Values” pending action on enabling “Location Trail
